## PROFESSIONAL SUMMARY

Results-driven Computer Science & Engineering graduate (B.E., 2025) with hands-on experience in Full Stack Web Development using the MERN stack, Java, and REST API development. Proven ability to build scalable, production-ready web applications, design structured database schemas, and deliver AI-driven solutions. Completed industry internship at Infosoft Technologies and published a research paper at an international AI conference. Actively seeking an entry-level role in Software Development, Backend Development, or Data/MIS Analysis.

## TECHNICAL SKILLS

- **Programming Languages:** Java, JavaScript (ES6+), Python, SQL
- **Frontend Technologies:** React.js, HTML5, CSS3, TailwindCSS, Redux Toolkit, Recharts
- **Backend Technologies:** Node.js, Express.js, REST APIs, JWT Authentication, Server-Side Rendering (Next.js)
- **Databases:** MongoDB, PostgreSQL, MySQL, SQL
- **Tools & Platforms:** Git, GitHub, Eclipse, MS Excel, Power BI, Google Sheets, Postman
- **Concepts & Methodologies:** OOPs, MVC Architecture, MERN Stack, Agile, Data Visualization, Computer Vision, Blockchain
- **Operating Systems:** Windows

## PROFESSIONAL EXPERIENCE

### Full Stack Developer Intern | Infosoft Technologies, Ghaziabad, UP

Oct 2025 – Dec 2025

- Developed and maintained full-stack web applications handling both frontend (React.js) and backend (Node.js/Express.js) modules in an onsite production environment.
- Designed and integrated RESTful APIs with structured database operations using PostgreSQL and MongoDB, improving data retrieval efficiency.
- Collaborated with a team of senior developers across the complete SDLC — including code reviews, debugging, testing, and deployment to production.
- Delivered internship milestones on schedule and received an official internship completion certificate upon successful project delivery.

## PROJECTS

### Multi Shop Connect System | React.js, Node.js, Express.js, MongoDB, JWT

- Built a scalable multi-vendor e-commerce platform featuring role-based authentication (User, Shopkeeper, Admin) and a real-time chat system using WebSockets.
- Designed and implemented RESTful backend APIs for product listing, order management, and cart operations, integrated with MongoDB for structured data storage.

### Affiliate Postback Tracking System | Node.js, Express.js, PostgreSQL, Next.js

- Developed a secure server-to-server (S2S) affiliate tracking system for monitoring clicks, conversions, and postback events with real-time accuracy.
- Designed PostgreSQL database schemas and REST API endpoints for reliable data tracking, analytics reporting, and affiliate dashboard visualization.

### Executive Dashboard | React.js, Redux Toolkit, Recharts

- Built a fully responsive executive analytics dashboard with JSON-driven dynamic widget system supporting add, remove, and search functionality.
- Implemented interactive data visualizations and charts using Recharts for real-time business insights, KPI monitoring, and advanced data filtering.

#### **Plant Disease Detection Using AI (Major Project)** | *Python, TensorFlow, Computer Vision, AI/ML*

- Developed an AI-driven image classification system using Computer Vision to automate plant disease identification and generate actionable pathology reports.
- Published findings in a peer-reviewed research paper at the AIDETA International Conference (April 2025).

#### **Event Management System** | *MongoDB, Express.js, React.js, Node.js (MERN Stack)*

- Engineered a full-featured event management web application with modules for event creation, user registration, bookings, and admin management.

#### **Blockchain Proof-of-Concept (Mini Project)** | *JavaScript, Node.js*

- Implemented a small-scale blockchain proof-of-concept to demonstrate decentralized ledger principles, block creation, SHA-256 hashing, and chain validation.

## **EDUCATION**

---

**Bachelor of Engineering – Computer Science & Engineering | APJ Abdul Kalam Technical University, Greater Noida, India**  
*Aug 2021 – Jun 2025*

## **CERTIFICATIONS**

---

- MERN Stack Application Development Certification – TechSaksham (2024–2025)
- IR 4.0 Foundation Course Certification – TechSaksham
- JavaScript & Data Visualization using Python and Seaborn – DevTown (3-Month Training Program)
- Overview of Space Science – ISRO (Indian Space Research Organisation)

## **RESEARCH & PUBLICATIONS**

---

- *"Design, Implementation, and Comparative Analysis of Plant Pathology in the Digital Age Using AI"* – AIDETA International Conference | April 26, 2025

## **ACHIEVEMENTS**

---

- Published AI/ML research paper at AIDETA International Conference on Plant Disease Detection (April 2025).
- Received ISRO Certification in Overview of Space Science from the Indian Space Research Organisation.
- Represented college at a debate competition and earned a Certified Military Parade Participation award.
